Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Small Area and Administrative Data Division

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9723) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordi-nolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Division des données régionales et administratives

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9723) ou au centre de consultation de Statistique Canada à:

INTRODUCTION

Data Source

The data in this publication are derived from income tax data for 1984. Tax returns for 1984 were, for the most part, filed in the spring of 1985, and the mailing address at the time of filing is the basis for the geographic information in the tables. Demographic characteristics such as age and marital status are given for December 31, 1984. Income information is for calendar year 1984.

Geography

The following data are presented by Forward Sortation Area (FSA) in urban areas and for individual postal codes in rural areas. The FSA is the first three characters of the postal code (e.g., T5A). Within each FSA there are many individual postal codes. These postal codes can be classified by the type (i.e., mode) of mail delivery involved. In large urban areas mail can be delivered in a number of ways:

- to a specific business address;
- to a specific business address;
- to a rural route on the fringe of the urban area;
- to a locked box near a new subdivision (suburban service);
- to a locked box at a post office;
- to general delivery at a post office.

Tabulations for each FSA include only data corresponding to postal codes representing residential addresses. This is the only case where the place of residence is definitely within the boundaries of the FSA. The place of residence of persons using business addresses cannot be determined. It may or may not be in the same FSA. For other types of mail delivery (e.g., rural route, suburban service), the postal code and therefore the FSA, relates to the location of the Post Office rather than the place of residence. All persons using business addresses, post office boxes, or

Source des données

Les données tirées des déclarations de revenus des particuliers pour l'année 1984 sont à la base des tableaux contenus dans cette publication. La ventilation géographique est obtenue à partir de l'adresse de retour inscrite sur les déclarations, celles-ci ayant été complétées, en majorité, au printemps de l'année 1985. Les indicateurs démographiques tels que l'âge et l'état civil sont en date du 31 décembre 1984. Les données sur le revenu correspondent aux revenus déclarés pour l'année 1984.

Géographie

La ventilation géographique des régions urbaines se situe au niveau des Régions de tri d'acheminement (RTA) du courrier. Celle des régions rurales se situe au niveau des codes postaux individuels. Une RTA se caractérise par les trois premiers caractères des codes postaux qui la constituent (e.g., H1A). Dans une RTA donc, on retrouve plusieurs codes postaux différents. Ceux-ci sont classifiés selon le type de distribution du courrier qui leur est propre. Dans un grand centre urbain, le courrier peut être distribué soit:

- à une résidence spécifique,
- à une entreprise spécifique,
- à une route rurale en périphérie,
- à une case près d'une nouvelle banlieue (service de banlieue),
- à une case au bureau de poste,
- à la poste restante.

Seules les déclarations dont le code postal de l'adresse de retour indique une résidence spécifique sont retenues pour les calculs des données; seuls ces codes postaux indiquent un lieu de résidence effectivement à l'intérieur d'une RTA. Le lieu de résidence des personnes dont le code postal de l'adresse de retour indique une entreprise ne peut être déterminé de façon précise. Les codes postaux classifiés selon les autres types de distribution du courrier indiquent l'emplacement du bureau de poste plutôt que l'adresse du déclarant. Donc, les déclarations à codes postaux indiquant

general delivery have been dropped. The proportion dropped account for approximately 5% of the taxfilers.

In some urban FSAs, there are rural routes and suburban service areas. These areas are shown separately and not included in the specific FSA line, but are included in the FSA totals.

Table Contents

The data (subject to the geographic exclusions noted above) are presented in four sections:

- all taxfilers;
- taxfilers reporting any income;
- taxfilers reporting either employment income or income from unemployment insurance benefits;
- taxfilers reporting any employment income.

Demographic characteristics are given for all taxfilers. Some taxfilers have no income but file for other reasons, such as to claim a Child Tax Credit. For those taxfilers reporting some income, a distribution by income and medians are given. For taxfilers reporting employment income or unemployment insurance benefits (a "labour force" group), a number of demographic characteristics are shown. For taxfilers with employment income, medians by sex are given.

Appendices

Appendix A is a list of the column numbers, with a description or definition provided for each. Because of limited space, the column headings are very brief. The column numbers have been provided to ease the search for their descriptions.

la distribution à une entreprise, à une case au bureau de poste, ou à la poste restante sont éliminées au départ; elles n'entrent pas dans le calcul des indicateurs pour chaque RTA. Environ cinq pour cent du nombre total des déclarations sont ainsi éliminées.

Dans certaines RTA urbaines, il existe des régions de distribution du courrier de type route rurale et de type service de banlieue. Ces régions sont séparément inscrites aux tableaux. Elles entrent cependant dans le calcul des totaux de la RTA correspondante.

Contenu des tableaux

Les données présentées aux tableaux se divisent essentiellement en quatre catégories:

- données dont la couverture s'étend à tous les déclarants (sauf ceux dont l'adresse de retour ne satisfait pas aux conditions énoncées ci-dessus),
- données représentant ceux qui, parmi le groupe ci-dessus, ont déclaré un revenu quelconque,
- données représentant ceux qui, parmi le groupe précédent, ont déclaré un revenu d'emploi ou des prestations d'assurance-chômage,
- données représentant ceux qui ont déclaré un revenu d'emploi.

Certaines variables démographiques se retrouvent dans chaque catégorie. Pour les déclarants avec un revenu quelconque, une répartition du revenu total est présentée, ainsi que le revenu total médian. Certains indicateurs démographiques sont indiqués pour les personnes ayant déclaré un revenu d'emploi ou de prestations d'assurance-chômage; celles-ci forment en quelque sorte un groupe de la population active. La médiane du revenu d'emploi est indiquée pour les individus ayant déclaré un revenu d'emploi, selon le sexe.

Appendices

Les différentes variables inscrites aux tableaux sont définies à l'appendice A. À chacune d'elles correspond un nombre identifiant la colonne à laquelle on la retrouve.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

... figures not appropriate or not applicable.

- nil or zero.

x confidential to meet secrecy requirements of the Statistics Act.

This publication was prepared under the direction of John Leyes, Director, Small Area and Administrative Data Division, with major contributions by Mario Bédard, Sue Biscope, Marty Clattenburg, Nelson Kopustas, Kim Lauzon, Sharon McEwen, Paul Pagé (ISD), Jean-François Richer (ISD), and Linda Standish.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

... n'ayant pas lieu de figurer.

- néant ou zéro.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Cette publication a été rédigée sous la direction de John Leyes, directeur de la division des données régionales et administratives, avec le concours appréciable de Mario Bédard, Sue Biscope, Nelson Kopustas, Kim Lauzon, Sharon McEwen, Paul Pagé (DSI), Jean-François Richer (DSI), et Linda Standish.

<https://archive.org/details/31761117134353>

The proportion of the labour force covered is quite high. In 1984, 12,137,000 taxfilers reported employment income and/or receipt of unemployment insurance benefits. The monthly Labour Force Survey reported an annual average labour force of 12,399,000, about 2% higher.

All income data are unadjusted. Because persons with low income have no tax liability and therefore many do not file tax returns, income measures such as medians have an upward bias, as illustrated in a comparison to the Statistics Canada annual Survey of Consumer Finances (SCF) in 1984:

| | |
|-------------------|----------|
| Tax median income | \$14,829 |
| SCF median income | \$12,700 |
| Difference | 16.8% |

Additional Data

This is the first time these data have been published, but it is expected that this will become an annual publication.

Other data, in the form of special tabulations, are available from the Small Area and Administrative Data Division.

For further information call:

John Leyes
Nelson Kopustas
Mario Bédard
Linda Standish

Le rapport population active / déclarants avec revenu d'emploi ou prestations d'assurance-chômage est plutôt élevé. En 1984 on compte 12 137 000 déclarants avec de tels revenus, alors que l'Enquête sur la population active dénombre la population active à une moyenne annuelle de 12 399 000, soit une différence d'approximativement 2 %.

Les données sur le revenu n'ont subi aucun ajustements. Puisque les personnes à faibles revenus ne sont pas assujetties à l'impôt et, donc, ne produisent pas de déclarations de revenus, les indicateurs de revenus sont biaisés positivement. L'Enquête annuelle de Statistique Canada sur les finances des consommateurs (EFC) le montre:

| | |
|---------------------------|-----------|
| revenu médian, impôt | \$ 14 829 |
| revenu médian, EFC | \$ 12 700 |
| différence en pourcentage | 16,8 |

Données additionnelles

Ces tableaux sont publiés pour la première fois. Ils seront probablement reproduits annuellement.

D'autres données, sous forme de tableaux spéciaux, sont disponibles de la Division des données régionales et administratives.

APPENDIX A

Description of Column Headings

The column description in Table 1 is very brief so this appendix has been organized to facilitate identification of the description and definition of each variable by its respective column number appearing in the table.

The four categories refer to the corresponding sections in the table: all taxfilers; taxfilers reporting any income; taxfilers reporting employment income and/or unemployment insurance; and taxfilers reporting any employment income.

Column:

1 Area

The area is either a rural or urban post office. If it is a rural post office, only one line of data appears. If it is an urban area perhaps several lines of data are shown. Each line will be for one of four types:

1. An FSA (e.g., T1A) - the first three positions of the postal code. This is the Forward Sortation Area. If there are four or more FSAs for one urban area, a map is provided in the appendix of maps.
2. A postal code followed by "RR" (e.g., T1A1R5-RR). This is a rural route served from an urban area. The people served by this rural route may not live within the boundaries of the FSA.
3. A postal code followed by "SS" (e.g., T1A2T6-SS). This is a suburban service area served by this post office. The people served by this suburban service may not live within the boundaries of the FSA.
4. A "TOTAL" line which gives data for all the entries within the urban area. Because of rounding numbers of taxfilers to a base of 25, the aggregates on this line may not be the sum of the individual components included in its calculation.

All Taxfilers

2 Number

The number of individuals who filed a personal income tax return in 1984.

3 Percentage Change 1979-1984

The percentage change in the number of taxfilers from 1979 to 1984.

4 Female Percentage

The percentage of 1984 taxfilers who were female.

5 Married Percentage

The percentage of taxfilers who reported themselves as married on December 31, 1984.

6 to 9 Percentage by Age

Percent of 1984 taxfilers in the given age group:

| <u>Column</u> | <u>Age Group</u> |
|---------------|------------------|
| 6 | <25 |
| 7 | 25-44 |
| 8 | 45-64 |
| 9 | >64 |

10 Percent Apt.

The percentage of 1984 taxfilers who filed from multiple-unit dwellings with more than 50 units.

Taxfilers Reporting Income

In 1984, for all of Canada, 96% of all taxfilers reported some income. Columns 11 through 22 include data for this group.

11 Number

The number of taxfilers reporting some income in 1984.

12 to 17 Percentage With Income Greater Than

Of those taxfilers who reported income, this is the percentage who reported income greater than the specified limits:

| <u>Column</u> | <u>Limit</u> |
|---------------|--------------|
| 12 | \$15,000 |
| 13 | \$25,000 |
| 14 | \$35,000 |
| 15 | \$50,000 |
| 16 | \$75,000 |
| 17 | \$100,000 |

18 to 20 Median Total Income

Median total incomes, rounded to the nearest one hundred dollars. Half of the people who reported any income reported an income less than or equal to the median income. The medians are reported for each sex and both sexes combined:

| <u>Column</u> | <u>Sex</u> |
|---------------|------------|
| 18 | Male |
| 19 | Female |
| 20 | Both Sexes |

21 Canadian Index

The 1984 median total income for both sexes (column 20) for the postal code area is compared to the Canadian median and expressed as an index (Canadian median \$14,829 = 100). An index of 120 indicates that the median total income for an area is 20% higher than the Canadian median.

22 Percentage Change 1979-1984

This is the percentage change in median total income between 1979 and 1984.

Taxfilers Reporting Employment Income and/or U.I.

The data presented in the following columns applies only to those taxfilers who reported either employment income or income from unemployment insurance benefits, or both. In 1984 for all of Canada, 81% of all taxfilers reported at least one of these sources of income.

23 Number

The number of 1984 taxfilers who reported either or both of employment income or income from unemployment insurance benefits.

24 U.I. Percentage

The percentage of taxfilers included in column 23 who reported receipt of unemployment insurance benefits.

25 Female Percentage

The percentage of taxfilers included in column 23 who were women.

Taxfilers Reporting Any Employment Income

The data in the next three columns applies only to those taxfilers who reported employment income. Half of the taxfilers who fall in this category reported an employment income less than or equal to the median.

26 to 28 Median Employment Income

The medians, rounded to hundreds of dollars, are given for each sex and for both sexes combined:

| <u>Column</u> | <u>Sex</u> |
|---------------|------------|
| 26 | Male |
| 27 | Female |
| 28 | Both sexes |

29 Area

See column 1.

APPENDICE A

Description des en-têtes des colonnes

Les variables inscrites aux tableaux sont définies dans ce qui suit. A chacune d'elles correspond un nombre identifiant la colonne dans laquelle on la retrouve. Une variable se retrouve parfois chez plus d'un groupe de déclarants. Les données sont regroupées en quatre grandes catégories, chaque catégorie correspondant à un regroupement des déclarants :

- tous les déclarants dont le code postal de l'adresse de retour satisfait aux conditions énoncées dans la section Géographie,
- tous les déclarants, parmi les précédents, ayant déclaré un revenu quelconque,
- tous les déclarants, parmi les précédents, ayant déclaré un revenu d'emploi et/ou de prestations d'assurance-chômage,
- tous ceux qui, parmi les précédents, ont déclaré un revenu d'emploi.

Colonne:

1 Région

Le nom dans la colonne Région correspond au nom du bureau de poste de la localité, bureau rural ou urbain. Dans le cas d'un bureau de poste rural, seulement une rangée de données est inscrite au tableau; pour une région urbaine, plusieurs rangées de données peuvent apparaître. Chaque rangée de données correspond à une de quatre classes de régions géographiques:

1. RTA: la RTA consiste en une région définie par des codes postaux dont les trois premiers caractères sont les mêmes. Pour les localités comptant plus de trois RTA, une carte géographique est incluse dans le troisième appendice.
2. Code postal suivi de "RR": ce code postal désigne une route rurale desservie à partir de cette localité urbaine. Les déclarants ayant un tel code postal de retour peuvent ne pas demeurer dans la RTA définie par ses trois premiers caractères.
3. Code postal suivi de "SS": ce code postal désigne une région à service de banlieue de distribution du courrier, à partir de ce bureau de poste. Ici encore, les individus ayant un tel code postal de retour peuvent ne pas demeurer à l'intérieur des limites de la RTA définie par ses trois premiers caractères.
4. Total: pour les régions urbaines constituées de plus d'une sous-région, et ayant donc plus d'une rangée de données, les totaux des variables sont indiqués. Suite à l'arrondissement, le total peut ne pas correspondre à la somme des valeurs individuelles.

Tous les déclarants**2 Nombre**

Cette variable indique le nombre total de déclarants, avec ou sans revenus pour l'année civile 1984, et dont le domicile est identifiable à la région.

3 Changement en pourcentage, 1979-1984

Le changement en pourcentage du nombre total de déclarants de 1979 à 1984 est indiqué dans cette colonne.

4 Proportion des déclarants de sexe féminin

Cette colonne indique le pourcentage des effectifs féminins par rapport au nombre total de déclarants.

5 Proportion des déclarants mariés

Cette variable montre le pourcentage des déclarants qui se sont indiqués mariés en date du 31 décembre 1984.

6 à 9 Répartition selon le groupe d'âge

Ces colonnes indiquent le pourcentage du nombre total de déclarants qui, en date du 31 décembre 1984, appartenaient aux groupes d'âge suivants : moins de 25 ans, 25 à 44 ans, 45 à 64 ans et, 65 ans et plus respectivement.

10 Proportion en appartement

Cette variable indique le pourcentage du nombre total de déclarants qui demeurent dans des édifices à logements de plus de 50 unités.

Déclarants avec un revenu quelconque

En 1984, 96 % des déclarants canadiens ont rapporté un revenu quelconque.

11 Nombre

Cette colonne indique le nombre de déclarants qui, parmi le groupe précédent, ont déclaré un revenu quelconque pour 1984.

12 à 17 Proportion des revenus élevés

Ces variables indiquent, dans l'ordre, les pourcentages de déclarants avec revenus plus élevés que : 15 000, 25 000, 35 000, 50 000, 75 000 et, 100 000 dollars en 1984.

18 à 20 Revenu total médian

Ces colonnes indiquent les médianes du revenu total des hommes (colonne 18), des femmes (colonne 19) et des deux sexes (colonne 20). Les médianes sont arrondies aux 100 dollars près.

21 Indice en rapport à la médiane canadienne

Cet indice situe le revenu total médian des deux sexes pour la petite région par rapport à la médiane correspondante pour le Canada. En 1984, le revenu total médian canadien pour les deux sexes est de 14 829 dollars = indice = 100.

22 Changement en pourcentage du revenu médian, 1979-1984

Cette colonne indique le changement en pourcentage du revenu total médian des deux sexes de 1979 à 1984.

Déclarants avec un revenu d'emploi et/ou de prestations d'assurance-chômage

Les données présentées aux colonnes suivantes s'appliquent aux déclarants qui ont rapporté soit un revenu d'emploi, soit des prestations d'assurance-chômage, soit les deux. En 1984, ces déclarants comprennent 81 % de tous les déclarants canadiens.

23 Nombre

Cette colonne indique le nombre de déclarants qui, parmi les précédents, ont déclaré un revenu d'emploi et/ou de prestations d'assurance-chômage pour 1984. Un revenu d'emploi comprend les gains en provenance de traitements et salaires ainsi que les revenus d'emploi autonome.

24 Proportion des prestataires

Cette variable montre la proportion d'individus qui, parmi ceux inscrits à la colonne précédente, ont déclaré des prestations d'assurance-chômage pour 1984.

25 Proportion de sexe féminin

Cette variable indique la proportion des effectifs féminins parmi les effectifs indiqués à la colonne 23.

Déclarants avec un revenu d'emploi

Les données présentées aux colonnes suivantes s'appliquent aux déclarants qui ont rapporté un revenu d'emploi.

26 à 28 Revenu d'emploi médian

La médiane du revenu d'emploi chez les hommes, chez les femmes et pour les deux sexes est indiquée aux colonnes 26 à 28 respectivement. Les prestations d'assurance-chômage n'entrent pas dans le calcul de ces médianes.

29 Région

Voir colonne 1.
